

Dear Parents/Carers,

The school has recently enrolled on the Dot Com Digital programme. This is a powerful online learning platform focused on giving your child strategies to develop safe behaviours in an ever-changing world.

The programme is designed to meet the government requirements of the 2020 RSE Framework. Based on three core pillars; wellbeing, health and relationships, the RSE Framework supports children to make 'sound' decisions, build resilience and develop appropriate responses, with the aim of becoming happy and successful adults.

Dot Com Digital is delivered by your child's teaching staff during the school day and follows a series of lesson which provide children with the opportunity to discuss and reflect upon real life issues important to them in a safe place.

The programme is based around a series of fun, fictional characters. Children will be able to explore the challenges that the characters face, reflect on how they overcome them and adopt these strategies in their own lives.

One key feature of Dot Com Digital is the Dot Minute. Accessible during their Dot Com lessons, this feature gives children the opportunity to request time with their teacher to discuss issues that may be worrying or affecting them.

Dot Com Digital aims to help prepare your child for the opportunities, responsibilities, and experiences of a successful adult life.

If you would like to find out more or have any questions, please contact your child's class teacher.
